

Microsoft

Excel 2013

Power Functions

A Division of GIL Consultancy Pte Ltd
Building Foundations for Excellence

A 2-day course filled with practical hands-on practice that is designed to equip users with features in Microsoft Excel 2013 that is not covered in a main stream Excel training class.

These advanced Excel functions will enable users to perform data searches and data analysis quickly and easily. Users will also be able to perform calculations using a variety of functions making many every day mundane and time consuming tasks a breeze. If you want to be empowered to obtain results faster in a much simpler way, enabling you to be more productive, this is the course for you.

This course will use practical examples to enhance learning and show you the relevance in using these formulas and functions in real-world scenarios.

This Course is For

Learners who have attended our Microsoft Excel 2013 Basic to Intermediate module or must be well versed in those topics covered in the module.
