Building Foundations for Excellence

This 3-day hands-on and fun filled course is designed to take you through a unique learning perspective into Photoshop. Now everywhere we look from group photos, to magazines to movie posters to family outing photos, chances are, you've seen compositing with Photoshop.

This is the class you need to attend to learn the how to apply a series of techniques but more importantly master the essential concepts of photo editing to unlock the possibilities in mastering Photoshop. This is the only course that covers imaging with video editing in Photoshop.

Whether you shoot with RAW or post-processed images, Histogram is the "heart" for photo imaging from photo shoot to Photoshop and in checking for accurate exposure in the camera. You will learn to understand the Histogram concepts together with the use of the various Photoshop tools that you know but more importantly we like to equip you on how you can use the Photoshop tools on what you may already know.

You will have a good understanding of most of Photoshop's advanced tools and their capabilities which you can decide how you will use them correctly to manipulate your digital photographs more effectively.

You are encouraged to bring your own digital images to work with in this class.

This Course is For

Learners who have completed our Photoshop Fundamentals and Intermediate modules or those who have good working experience in Photoshop CS6.

Public Sector: Division 1, 2 & 3
Private Sector: Applicable to All

Duration
3 Days (21 hours)
