

Microsoft PowerPoint 2019 Illustrating

A Division of GIL Consultancy Pte Ltd
Building Foundations for Excellence

We use visuals such as illustrations as key elements in visual communication for e-learning and infographics. They help attract the viewer's attention and reinforce key messages. A picture speaks a thousand words. Did you know Microsoft PowerPoint can create unique and impactful illustrations (Your alternative to Adobe Illustrator) such as human characters and objects/shapes (all drawn in PowerPoint) and much more at no extra cost? The example images seen below are drawn entirely with features in PowerPoint by our very own Trainer!

Have you ever seen an interesting or appropriate image object that might be of use to you for illustration purpose in your presentation or report but don't know how to reproduce something similar? No problem! MS PowerPoint offers incredibly useful drawing tools that comes with fully customizable options to let you reproduce something similar or to create your own illustrations even if you have zero artistic ability. Let us show you how.
